

## MEDICAL.

## THE BEST

Is the best Blood Medicine, because it assists nature to throw off the impurities of the blood, and at the same time tones up the entire organism. This is just what is needed in the various blood diseases, such as scurvy, rickets, etc., which build up the impurities in the system, thus producing much sickness and suffering. Therefore, for a

## BLOOD MEDICINE

You cannot do better than take S. S. S. "As a physician, I have prescribed and used S. S. S. in my practice as a tonic, and for blood troubles, and have been very successful. I never used a remedy which gave such general satisfaction to myself and patients."

## FINANCIAL REVIEW.

Henry Clews's Weekly Letter on the Money Outlook.

## A CALMER FEELING MANIFESTED

On Wall Street—Various Events Which Have Tended to an Improvement in the Situation—The Period of Violent Disturbance Has Passed Its Climax.

Special Dispatch to the Intelligencer.

NEW YORK, March 11.—In our last weekly review of the situation in Wall street, we indicated an improvement in symptoms and a tendency towards a calmer feeling. This drift has been without interruption, however, which shows that the recovery is not yet complete. Our relations with foreign markets exhibit a very distinct improvement. There is less desire on the part of European banks to force remittances of gold from this country irrespective of what may be required by the commercial movement. The Bank of France seems to have satisfied its desire to accumulate gold; and nothing further is heard of efforts by the Austrian government to augment its supply of that metal. This indicates an abatement, if not a suspension, of one important cause of the last two months' drain upon our stock of gold; which amounts to an important relief of the local situation.

Another evidence of improvement has appeared in the shipment of quite important amounts of stocks and bonds to the London market. This is to be welcomed not merely for the sake of its increasing the supply of bill in London, but still more as evidence that the failure of Congress to repeal the Sherman silver act has not so much disturbed foreign confidence in our investments as had been feared. No doubt the bulk of these purchases have been of gold-bearing securities, but that discrimination implies that the misgivings among foreign investors apply principally to obligations that might, under certain circumstances connected with silver, become payable in that metal. We cannot expect foreigners to take freely the latter class of investments until the country has protected itself against the possibility of incurring further commitments to the silver danger, but it is something to have those evidences of a willingness to take securities legally payable in gold, for, after all, the bulk of our corporate mortgages are made expressly payable in that form of money. To this extent we are protected against inordinate returns of securities to the home market and are assured of an outlet for them in periods of depression or disturbance on this side of the Atlantic.

Another point of improvement in the situation has arisen from an increase in the exports of products. The late large shipments of gold have been largely caused by the lightness of the exports of produce since January 1. The decrease, however, has not been due to any lack of surplus commodities for shipment; on the contrary, the visible supply of wheat and corn exceeds that we held at the same season following the unprecedented crops of 1891. The accumulation of grain is due to our market being held by speculation above the European level. The export of cotton has been restrained by similar causes.

It is only a question of time when speculative holders must be compelled to accept the European range of values; and the stringency in money and the caution among lenders may be expected to apply that compulsion at no distant day. While, therefore, it must be expected that for the next few weeks we shall stand exposed to the export of more gold, yet it seems reasonable to expect that such shipments will be materially lessened by exports from this extraordinary surplus of products. Under all the circumstances, therefore, it is likely to turn out that the unusual exports of specie during the last two months were in a large measure anticipatory of what invariably takes place in the spring months. The marked falling off in the export of gold during the last two weeks has been due principally to the cessation of the direct and special demand from France, to the revival of the shipments of produce, and to the advancing rates of interest on this market having made it more profitable to employ foreign balances here than to send them home.

All the aforementioned factors show that the period of violent disturbance has passed its climax, and that a reaction has set in towards more normal conditions; and these changes will soon warrant the recovery in the tone of business at the stock exchange. There are, however, factors yet undetermined which may be expected to hold the improving tendency in restraint more or less for an indefinite period. Among these, we may mention the uncertainty as to whether Congress will be convened in extra session before the regular period to deal with certain specially urgent questions, and the absence from President Cleveland's inaugural address of any definite intimations as to what measures he would favor or condemn in respect to silver, bank currency, the treasury gold reserve and the tariff. It may be presumed that the President deemed such specific references as suitable for an address to Congress rather than in a declaration to the people at large; but it is nevertheless something of a disappointment that no light has come from the chief magistrate as to what form of legislation may be hoped for under the present disordered condition of large material interests.

The current free efflux of currency to the interior has not been generally expected, and causes some uneasiness among large speculative holders of stocks. The current rates of exchange at the West show that the outflow is due to legitimate trade causes, however unusual for the season; and the increase in the export of grain on account of interior owners may in part account for the change; while the remittances to Boston are probably due to large transfers of New England securities in connection with current railroad deals. It can hardly be expected, however, that these irregular movements will be long continued. For the immediate future, however, we may not expect an easy money market.

## A Cure for Pneumonia.

Pneumonia and kindred affections of the lungs can be easily prevented and cured by using an absolutely pure stimulant such as is used and recommended by the best physicians. Your doctor will tell you that Klein's "Silver Age" or "Duquesne" Rye Whiskies are absolutely pure and the best stimulant in the world to fortify the system against the inclemency of the weather. Silver Age sells for \$1.50 per quart and Duquesne at \$1.25. Headquarters, KLEIN, 82 Federal Street, Allegheny, Pa. Send for complete catalogue, mailed free.

## AN ITALIAN STORY.

How an American Countess Fooled a Gentle Blackmailer Who Wanted Money or Blood.

Correspondence Philadelphia Press.

I hear from Switzerland a rather curious story concerning the Italian Princess Vicovaro, who is an American by birth, being a daughter of Lorillard Spencer, of New York. The princess has a beautiful villa at Dreilinden, near Lucerne, where she is spending the winter. A few weeks ago she received several threatening letters, one of which contained a request that \$3,000 be deposited at a certain hour at a given place. If this were not done her child would be murdered and her villa blown up. The princess handed the letters to the police.

At the time appointed in the letter, a detective dressed in the height of fashion arrived on the spot indicated, and laid down a package appearing to contain money, and then disappeared. In a neighboring wood were a number of detectives lying concealed. Presently a well dressed young man looking cautiously about came up, eagerly snatched the parcel and retired into the wood, where he fell into the hands of the detectives, who immediately arrested him.

He turned out to be the son of a well-to-do and prominent citizen of Lucerne, and explained his crime by the fact that his parents kept him very short of money, and that as he was determined to visit America for the purpose of attending the World's Fair at Chicago, he could think of no other means than this for getting the necessary cash for the trip.

The princess, I may add, is a titular lady in waiting to Queen Marguerite, her residence at Rome is the famous Cenci palace, and her husband can trace his ancestry back to Marco Cenci, who was prefect of Cesar in the fourth century.

General Sherman and Grant.

From a Letter to Senator Sherman, in the Century for March.

NAASHVILLE, TENN., April 5, 1884. DEAR BROTHER: \* \* \* Grant is as good a leader as we can find; he has honesty, simplicity of character, singleness of purpose, and no hope or claim to usurp civil power. His character more than his genius will reconcile armies and attach the people. Let him alone. Don't distrust him by flattery or importunity. Let him alone. \* \* \* If bothered, hampered or embarrassed, he would drop you all in disgust, and let you slide into anarchy. \* \* \* Let us manage the whites and niggers, and let all the physical resources of the country, and apply them where most needed. Let us accomplish great results, leaving small ones to conform in due season.

I will be here about two weeks, and to the front. Let me hear from you. I care no more for the squabbles about the presidency than I do for the Schleswig-Holstein difficulty, and Grant cares less. \* \* \* Your brother, W. T. SHERMAN.

## Medical Testimony.

W. Thornton Parker, M. D., Recorder, Association of Acting Assistant Surgeons of the U. S. Army, writes:

"SALEM, MASS., March 23, 1891. "When at Stuttgart, Germany, during the winter of 1881-82, I was suffering from a severe attack of bronchitis, which seemed to threaten pneumonia. I met, at the Hotel Marguaret, Commander Beardslee, of the United States Navy. In speaking of my sickness, he remarked: "Doctor, you can cure that chest trouble of yours by using an ALLCOCK'S PLEURAL PLASTER." That may be true," I answered, "but where can I get the plaster?" "Anywhere in the civilized world, and surely here in Stuttgart. Whenever I have a cold, I always use one and find relief." I sent to the drug store for the plaster, and it did all that my friend had promised. Ever since then I have used it whenever suffering from a cold, and I have many times prescribed it for patients.

"THE ALLCOCK'S PLASTER is the best to be had, and has saved many from severe illness, and undoubtedly, if used promptly, will save many valuable lives. Whenever one has a severe cold they should put on an ALLCOCK'S PLASTER as soon as possible. It should be placed across the chest, the upper margin just below the neck; some hot beef tea, or milk, will aid in the treatment.

"This is not a patent remedy in the objectionable sense of that term, but a standard preparation of value. The Government supplies for the United States Army and Indian Hospital Stores contain ALLCOCK'S PLASTER, and the medical profession throughout the world are well aware of their reliability and excellence. I shall always recommend it, not only to break up colds, but as useful in allaying pains in the chest and in the back. It is a preparation worthy of general confidence."

Splinter pulling bees, at which the boys employed in the kindling wood mills extract the splinters accumulated during the day out of each other's hands, is the latest form of amusement down east.

## Great Triumph.

Instant relief experienced and a permanent cure by the most speedy and greatest remedy in the world—Otto's Cure for throat and lung diseases. Why will you continue to irritate your throat and lungs with that terrible hacking cough, when Logan Drug Co., sole agent, will furnish you a free sample bottle of this great guaranteed remedy? Its success is simply wonderful, as your druggist will tell you. Otto's Cure is now sold in every town and village on this continent. Samples free. Large bottles 50c.

## Rheumatism Quickly Cured.

Three days is a very short time in which to cure a bad case of rheumatism, but it can be done if the proper treatment is adopted, as will be seen by the following from James Lambert, of New Brunswick, Ill.: "I was badly afflicted with rheumatism in the hips and legs, when I bought a bottle of Chamberlain's Pain Balm. It cured me in three days. I am all right to-day, and would insist on everyone who is afflicted with that terrible disease to use Chamberlain's Pain Balm and get well at once." 50-cent bottles for sale by druggists.

## A Chanute (Kan.) shoemaker has a card in his window which reads: "Any respectable man, woman or child can have a fit in this store."

## Specimen Cases.

S. H. Clifford, New Cassel, Wis., was troubled with Neuralgia and Rheumatism, his Stomach was disordered, his Liver was affected to an alarming degree, appetite fell away, and he was terribly reduced in flesh and strength. Three bottles of Electric Bitters cured him.

Edward Shepherd, Harrisburg, Ill., had a running sore on his leg of eight years' duration. Used three bottles of Electric Bitters and seven boxes of Bucklen's Arnica Salve, and his leg is sound and well. John Speaker, Catawba, Ohio, had five large Fever sores on his leg, doctors said he was incurable. One bottle Electric Bitters and one box Bucklen's Arnica Salve cured him entirely. Sold by Logan Drug Co.

## FINANCE AND TRADE.

The Features of the Money and Stock Markets.

NEW YORK, March 11.—Money on call easy at 5 to 6 per cent, last loan 5 per cent, closed offered at 5 per cent. Prime mercantile paper 6 1/2 per cent. Sterling exchange dull and weaker at \$185 1/2 for 100. Sales 15,000 shanks. Speculation at the opening the market was quiet to-day. At the opening the market was inclined to weakness. Reading, however, was an exception, and moved a point on. London buying, and a committee has been appointed to look after the interests of the income bondholders. It is stated that it was not organized to antagonize A. S. Leod, but simply to meet the rights of income bondholders are protected. The bears attacked General Electric and drove it down rapidly. They also made a raid on St. Paul, Chicago, Burlington & Quincy and Lackawanna, depressing these stocks. With the exception of Missouri Pacific, which ran off to 5 1/2, the market closed tolerably firm.

## Breadstuffs and Provisions.

CHICAGO, March 11.—If there was any doubt about wheat being manipulated in the Chicago market that doubt disappeared to-day. The news received last night from Washington was calculated to depress prices, dishearten ordinary holders and inaugurate a regular bear campaign. The trails got all ready for this, but it did not come. There was the peculiar air at the opening of traders afraid to trade. A few buyers, orders and when they started in to get the wheat they found no offerings. They also felt that the old bull clung to the market. Short, but he had at first, took quick converts. The market proved stronger than the government reports, and more powerful for the moment than all bullish influences. Liverpool wheat was quoted lower, but cash wheat here was not affected. The close showed a gain of 1/2c over yesterday's closing prices for May and an advance of 1/4c in July.

Corn and provisions were firm.

Flour quiet and unchanged.

WHEAT—Cash, No. 2, spring 75 1/2c; No. 3, spring 75 1/4c; No. 4, spring 75 1/8c; No. 5, spring 75 1/2c; No. 6, spring 75 1/4c; No. 7, spring 75 1/8c; No. 8, spring 75 1/2c; No. 9, spring 75 1/4c; No. 10, spring 75 1/8c;
